

North Bill Disposal^{LLC}

State-of-the-art waste water disposal plant

North Bill Disposal, family owned and operated, is an expansive oilfield waste water disposal plant serving the Powder River Basin of Wyoming.

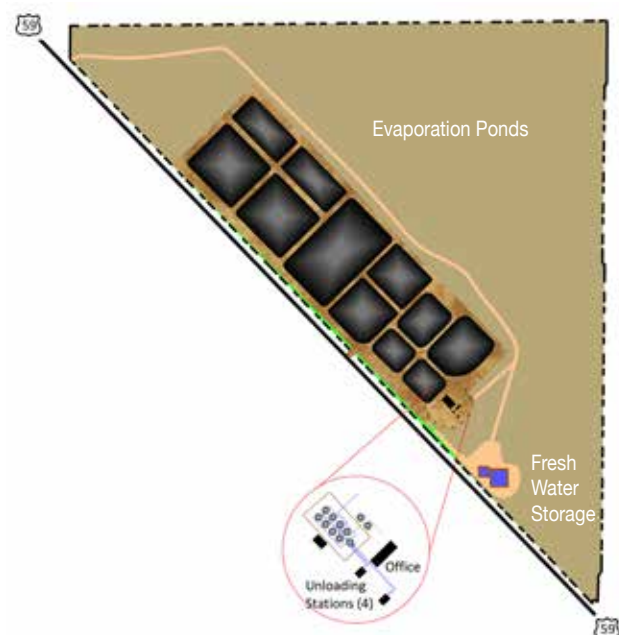

Offload Facility

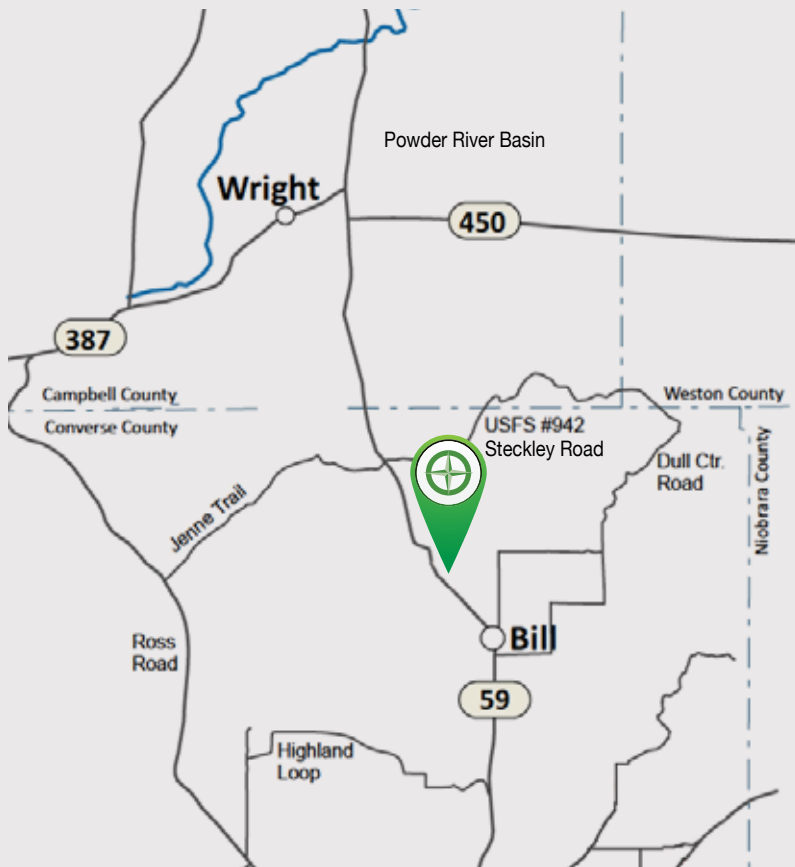

North Bill Disposal Capabilities

- 11 evaporative ponds totaling nearly 6 million barrels
- Our state-of-the-art offload facility will drastically reduce your trucking costs by unloading at an expedited rate of 8 minutes per 130 barrels, cutting your costs in half
- 4 unloading stations with the ability to quickly acquire 2 additional stations
- Accepts oilfield produced and flowback water on a per barrel basis
- Competitively priced with even further reduced rates at higher volumes
- Fresh water available in large capacity through 6 meter stations that are simple and accurate
- 100% compliant with the strict standards and regulations of Wyoming Department of Environmental Quality, United States Environmental Protection Agency, and Wyoming Game and Fish Department
